Consignment module

Transmit consignments to your drivers rapidly and free from errors? Modify trip lists in a flexible manner? Make use of the CarrierWeb consignment module: you simply send the trip consignments and lists to the various vehicles via the CarrierWeb Connector. Drivers receive the consignments on their screen in the cabin. As you would expect, the planning department can modify and/ or add to consignments as and when necessary. The exact status of trip consignments is available for your home base and your customers in real time.

The real-time feedback of consignment or assignment status and the simplicity and user-friendliness of our consignment module ensures correct input of information. Your drivers only enter any variables, which means that errors as a result of incorrect keying are kept to a minimum. The CarrierWeb Connector can integrate with standard TMS, planning software and wage administration to more efficiently run your business.

Advantages

Real time notification of consignment status ✓

Drivers have up-to-date consignment and trip information ✓

Easy planning and modification of consignments or trip lists ✓

Efficient real-time and online communication between planning and drivers ✓

Reliable and up-to-date status information thanks to automatic data feedback ✓

Optimal information for customers about consignment status (your customers can follow developments via Internet) ✓

Simple link with various TMS and remuneration systems promotes business efficiency ✓

Automatic registration of hours and kilometres for each consignment and/or trip number ✓

Efficiency thanks to automatic navigation on the basis of trip consignment or distribution list ✓

All important data at your fingertips
The driver can see all the information he needs for his trips on his screen in the cabin:
+ trip details
+ loading/discharge addresses
+ contact person
+ order numbers
+ packages: quantity, weight, volume, loading meters, etc.
+ slot times, loading/discharge times
+ etc.

In this way, the planning department can also pass on any special requests to your drivers. Via the touch screen, the driver enters status messages which are automatically linked to the consignment or trip number, vehicle, driver, customer location, time and duration.

Thanks to a link with the CarrierWeb navigation module, the driver can automatically be navigated to the correct load or discharge address for every consignment.
